

ANGUILLA FINANCIAL SERVICES COMMISSION

Financial Statements

December 31, 2009

(expressed in United States dollars)

ANGUILLA FINANCIAL SERVICES COMMISSION
FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31 DECEMBER, 2009

CERTIFICATE OF AUDIT AND REPORT OF THE CHIEF AUDITOR

Section 62(2) of the Financial Administration and Audit Act 2003 (Revised Statutes of Anguilla Chapter F27)(the Act) permits me, as Chief Auditor, to accept the audit of the accounts and financial statements of a government agency by an independent auditor of the government agency if the appointment of the auditor has been approved by me, and the audit of the government agency has been performed in accordance with my directions.

After I accept the audit of the accounts and financial statements of a government agency by an independent auditor, Sections 62(6) and (7) of the Act require me to issue a certificate of audit and prepare a report that evidence the acceptance of the audit of the independent auditor, and to send the certificate of audit and report to the government agency, to the minister responsible for the government agency and to the Minister of Finance.

Section 16 of the Financial Services Commission Act 2003 requires the Financial Services Commission to submit to the Governor a copy of its audited accounts, including the report of the auditor on the accounts, and a report on its operations and activities for the financial year (the annual report). The Governor is required, as soon as is reasonably practicable, to cause them to be tabled in the House of Assembly.

The appointment of PriceWaterhouseCoopers (PwC) as the independent auditor of the Financial Services Commission was approved by me. PwC were directed to undertake their audit in accordance with appropriate auditing standards, and I accept their audit of the Commission's financial statements for the year ended 31 December 2009.

As recorded in their Auditors' Report, PwC have audited the Balance Sheet of the Financial Services Commission as of 31 December 2009, the statements of comprehensive income, changes in accumulated reserves and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes. The Commission's management is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards and the Financial Services Commission Act, 2003. PwC's responsibility is to express an opinion on the financial statements based on their audit.

PwC conducted their audit in accordance with International Standards on Auditing. Those standards require that PwC comply with ethical requirements and plan and perform the audit to obtain reasonable assurance on whether the financial statements are free of material misstatement. An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements. PwC believe that the audit evidence they have obtained is sufficient and appropriate to provide a basis for their opinion.

In PwC's opinion, the financial statements present fairly, in all material respects, the financial position of the Anguilla Financial Services Commission as of 31 December 2009 and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards and the Financial Services Commission Act, 2003.

I have no observations to make on these financial statements.

M L Daynes
Chief Auditor

To the Chief Auditor of Anguilla

We have audited the accompanying financial statements of the **Anguilla Financial Services Commission** which comprise the balance sheet as of December 31, 2009, the statements of comprehensive income, changes in accumulated reserves and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards and the Financial Services Commission Act, 2003. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

PricewaterhouseCoopers refers to the Eastern Caribbean firm of PricewaterhouseCoopers and the other member firms of PricewaterhouseCoopers International Limited, each of which is a separate and independent legal entity. A full listing of the partners of the Eastern Caribbean firm is available on request at the above address.

Opinion

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Anguilla Financial Services Commission as of December 31, 2009 and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards and the Financial Services Commission Act, 2003.

1. **General information**

Incorporation and principal activity

The Anguilla Financial Services Commission (“the Commission”) was established under the Financial Services Commission Act on November 26, 2003 and it commenced operations on February 2, 2004 in the Valley, Anguilla, BWI.

The principal activity of the Commission is to regulate the financial services industry in Anguilla in accordance with the prescribed financial services enactments and to carry out such other functions as are determined under section 3 of the Financial Services Commission Act, 2003.

2. **Change of financial year end by the Commission**

The financial year of the Commission is specified by law. The year end was changed from August 31 to December 31 as a result of an enactment of the Financial Services Commission (Amendment) Act 2007 on February 18, 2008. The change was recommended by the Board as being appropriate to align the financial year more closely with the operating cycle of the Commission. Accordingly, these financial statements have been drawn up as of December 31, 2009 and for the twelve (12) month period then ended. Comparative figures are provided as of December 31, 2008 and for the sixteen (16) month period then ended.

3. **Summary of significant accounting policies**

a) **Basis of preparation**

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS), the Financial Services Commission Act, 2003 and under the historical cost convention.

The preparation of financial statements in conformity with International Financial Reporting Standards requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management’s best knowledge of current events and actions, actual results may differ from those estimates.

Amended Standard adopted by the Commission

The Commission has adopted the following amended IFRS as of 1 January, 2009:

IFRS 7, ‘Financial instruments-Disclosures’ (amendment) - effective 1 January, 2009. The amendment requires enhanced disclosures about fair value measurement and liquidity risk. In particular, the amendment requires disclosure of fair value measurements by level of a fair value measurement hierarchy. As the change in the accounting policy only results in additional disclosures, there is no impact on the financial results of the Commission.

(Expressed in United States dollars)

3. Summary of significant accounting policies (continued)

b) Property and Equipment

Property and equipment are stated at historical cost, less accumulated depreciation and impairment losses, if any. Historical cost includes expenditure that is directly attributable to the acquisition of the assets.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Commission and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the statement of surplus during the financial period in which they are incurred.

Depreciation is calculated using the straight-line method to allocate the cost of each asset to their residual values, if any, over the estimated useful lives indicated below.

Furniture and fittings	5-10 years
Computers and equipment	5-10 years

The asset's residual values and useful lives are reviewed and adjusted if appropriate at each balance sheet date.

An asset's carry amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in the statement of surplus.

c) Accounts receivable

Accounts receivable are carried at original invoice amount less provision made for impairment of these receivables. A provision for impairment of accounts receivables is established when there is objective evidence that the Commission will not be able to collect all amounts due according to the original terms of receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments are considered indicators that the accounts receivable is impaired. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the market rate of interest for similar borrowers. The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognised in the statement of surplus. When a trade receivable is uncollectible, it is written off against the allowance account for trade receivables.

d) Cash and cash equivalents

Cash and cash equivalents are carried in the balance sheet at cost. For the purposes of the cash flow statement, cash and cash equivalents comprise cash at bank and in hand, deposits held at call with banks, and other short term highly liquid investments with maturities at acquisition of three months or less.

(Expressed in United States dollars)

3. Summary of significant accounting policies (continued)

e) Foreign currency transactions

Functional and presentation currency

Items included in the financial statements of the Commission are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The Commission's functional and presentation currency is United States dollars.

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Monetary assets and liabilities denominated in currencies other than the functional currency are reported at the exchange rates prevailing at the year end. Any gain or loss arising from a change in exchange rates subsequent to the date of the transaction is included as an exchange gain or loss in the statement of surplus.

f) Revenue recognition

Licence fees

Licence fees comprise of amounts collected from companies licensed by the Commission. Revenue is recognised when the licence fees are due.

Interest income

Interest income is recognised in the statement of surplus for all interest bearing instruments on an accruals basis using the effective yield method based on actual purchase price. Interest income includes income earned on cash and cash equivalents and term deposits.

g) Impairment of non-financial assets

Property and equipment are reviewed for impairment losses whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the carrying amount of the asset exceeds its recoverable amount, which is the higher of an asset's net selling price and value in use. For the purposes of assessing impairment, assets are grouped at the lowest level for which there are separately identifiable cash flows.

h) Financial assets

The Commission classifies its financial assets as loans and receivables. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of its financial assets at initial recognition.

Loans and receivable are non derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months after the balance sheet date. At the balance sheet date, accounts receivable and term deposits are classified as loans and receivables.

Regular purchases and sales of financial assets are recognised on the trade-date – the date on which the Commission commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the investments have expired or have been transferred and the entity has transferred substantially all risks and rewards of ownership. Loans and receivables are carried at amortised cost using the effective interest method.

(Expressed in United States dollars)

3. Summary of significant accounting policies (continued)

h) Financial assets (continued)

The Commission assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired.

i) Provisions

Provisions are recognised when the Commission has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount can be made.

j) Employee benefits

Pension costs

The Commission's contribution to the Government's defined benefit pension plan is charged to the statement of comprehensive income in the period to which the contributions relate. The Commission does not have its own pension plan and its pension costs are limited to contributions made.

Post-employment obligations

The Commission recognizes a liability and an expense for gratuity due to its employees based on the terms of the employment contracts.

4. Financial risk management

The Commission's activities expose it to a variety of financial risks: market risk (including currency risk and interest rate risk), credit risk and liquidity risk.

(a) Market risk

Currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate because of changes in foreign exchange rates. Substantially all of the Commission's transactions, assets and liabilities are denominated in United States dollars. Therefore, there is no significant exposure to currency risk.

Interest rate risk

Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates. None of the Commission's liabilities are interest bearing. The interest bearing assets include cash, term deposits and investments (notes 6 and 7). The Commission is exposed to risk associated with the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows.

(b) Credit risk

Credit risk arises from the possibility that counterparties may default on their obligations to the Commission. The amount of the Commission's maximum exposure to credit risk is indicated by the carrying amount of its financial assets. Impairment provisions are made for losses that have been incurred at the balance sheet date, if any. The Commission monitors this risk annually or more frequently as deemed necessary.

(Expressed in United States dollars)

4. **Financial risk management (continued)**

(c) **Liquidity risk**

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the ability of funding through an adequate amount of committed credit facilities.

The table below analyses the Commission's liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows.

	Less than 1 year \$	Between 1 and 2 years \$	Between 3 and 5 years \$	Over 5 years \$	Total \$
At December 31, 2009					
Accounts payable and accrued expenses	52,056	-	-	-	52,056
Deferred revenue	313,391	-	-	-	313,391
	365,447	-	-	-	365,447
At December 31, 2008					
Accounts payable and accrued expenses	60,614	-	-	-	60,614
Deferred revenue	196,983	-	-	-	196,983
	257,597	-	-	-	257,597

(d) **Fair value of financial assets and liabilities**

Fair value amounts represent estimates of the consideration that would currently be agreed upon between knowledgeable, willing parties who are under no compulsion to act and is best evidenced by a quoted market value, if one exists. None of the Commission's financial assets and liabilities are traded in a formal market. Estimated fair values are assumed to approximate their carrying values.

5. **Critical accounting estimates and judgements**

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Commission makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. Management does not consider that there are estimates and assumptions that will have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

15. Contribution to the Government of Anguilla

In accordance with the Financial Services Commission (Amendment) Act 2008, the Commission may make payments from its surplus to the Government of Anguilla after all its reserves have been adequately funded. During the year ended December 31, 2009, the Commission made a monetary contribution of \$2,976 (2008: \$155,740) to the Government of Anguilla. This was reflected in the statement of changes in accumulated reserves.
